FOREWORD

This SUMMARY STATISTICS has been produced in response to the many requests for police and crime data received throughout the year from libraries and members of the public.

This Edition may show some small variances in data and statistics as compared to previous editions. Where these occur, the latest Edition will reflect the most current data available.

APPENDIX A - TABLE OF CONCORDANCE 86
Listing of Criminal Code and other federal statutes which are included in UCR crime and drug offence categories.

OVERVIEW OF THE STRUCTURE OF POLICING IN BRITISH COLUMBIA

In British Columbia there is a Provincial Force (RCMP), as well as twelve "Independent" Municipal Forces, forty-three RCMP contracted Municipal Forces, and eight RCMP "extended" municipal contracts. These Provincial and Municipal Forces provide police services to their own geographic locations, which together cover the entire Province. These jurisdictions and their three digit police code (or POLCD) are listed on page 3. (In addition to the Provincial and Municipal Forces, the RCMP Federal Force, Ports Canada Police, and the CN and CP Police are also present in the Province.)

Provincial Force (RCMP)

The Provincial Force polices the unincorporated (usually rural) areas and municipalities under 5,000 population. There are 125 Provincial Force Detachments. The cost of the Provincial Force is shared between the Federal and Provincial governments under the terms of the Federal /Provincial Policing Agreement.

Provincial detachments are usually named after a municipality. However, if a municipality is under 5,000 population, the Detachment polices not only that municipality but also the unincorporated area surrounding it. For example, Keremeos Provincial Detachment polices the Village of Keremeos as well as the rural areas and other communities outside the municipal boundaries.

On the other hand, if a municipality is over 5,000 population, the provincial detachment is only responsible for policing the surrounding unincorporated area. For example, Kelowna Provincial Detachment is only responsible for policing the areas outside the boundaries of the City of Kelowna. However, in many cases, the municipal and provincial detachment will work out of the same building and will act as one detachment which provides police services to the combined provincial and municipal detachment areas.

Provincial "Extended" Contracts (RCMP)

The 1981 Canada Census indicated that seven municipalities exceeded 5,000 population for the first time. In 1987 the incorporation of the community of Colwood created an additional municipality over 5,000 population. As a result of exceeding the 5,000 population threshold, these municipalities became responsible for the provision of police services in their communities. Instead of establishing their own police departments, or contracting for RCMP Municipal police services, it was agreed that the Provincial Force would extend police services to these eight municipalities on a fee for service basis, and the municipalities would reimburse the Province for the Provincial Force police services they received.

Municipal Forces (Independent and RCMP)

The Police Act and Municipal Act state that when a municipality reaches 5,000 population, it must assume responsibility for its police services. There are twelve municipalities with their own police departments in British Columbia. These twelve police departments are often referred to as "independent" municipal police forces. The cost of policing in these municipalities is borne 100% by the local taxpayers.

There are forty-three municipalities which contract for RCMP municipal police services. The cost of policing in these municipalities is shared between the municipality and the Federal Government under the terms of the Federal/Provincial Master Municipal Police Agreement. There are, however, two different cost sharing formulas: one for municipalities over 15,000 population, and one for municipalities under 15,000 population. The municipalities over 15,000 population pay a higher percentage of their costs than those which are under 15,000 population.

More detailed offence data, as well as information on the police strengths, boundaries, financing and demography of the various policing jurisdictions can be obtained from the Police Services Branch (Vancouver Office), Ministry of Solicitor General, Suite 207, 815 Hornby Street, Vancouver, British Columbia, V6Z 2E6, Telephone: 660-2604.

OVERVIEW OF UNIFORM CRIME REPORTING (UCR) SYSTEM

The offence and persons charged data contained in this SUMMARY STATISTICS publication is the product of the Uniform Crime Reporting (UCR) system. This data collection system was developed by Statistics Canada with the co-operation and assistance of the Canadian Association of Chiefs of Police. It became operational in 1962. Although some details of the data collection system have been modified at different points in the history of the programme, the fundamentals of the process have remained constant, producing an historical data file, most of which can be compared over the twenty-six year history of the Survey. The reports in this publication contain data for the last fourteen years, 1977 to 1990.

THE MEASUREMENT OF CRIME

The Uniform Crime Reporting Survey was designed to produce an indicator of the incidence of crime in Canadian society. There are a number of ways of measuring the incidence of crime and each method will yield a different result. The characteristics of the counting process will affect the count which is obtained. Different data collection systems will produce different figures of the same series of events since the count of events is a reflection of the definitions which are used and the manner in which the data are gathered.

The process of measuring the incidence of crime is complicated by the great diversity of human behaviours which are considered to be criminal. One can conceive of a very wide spectrum of criminal human behaviours from the most trivial (an occasional truancy) to the most serious (homicide). It is unlikely that a single data collection system could be designed to deal with this broad diversity of events. Different data collection methods will be sensitive to different parts of the spectrum.

The Uniform Crime Reporting project was designed to have local law enforcement agencies as respondents. This characteristic has very significant ramifications for the correct interpretation of UCR crime data. This means that the UCR project can contain, at most, information on only those crimes which come to the attention of police. The UCR crime data, therefore, do not contain a count of all crimes in Canada: some crimes are never detected; some which are detected are never brought to the attention of the police, and as a result, these criminal events can never be recorded by the UCR project.

The fact that UCR data are based on a count of those criminal events which are known to the police means that crimes which are counted by the UCR system are a subset of all crimes in Canada. But this characteristic also means that all the crimes which are included in the UCR data system have successfully passed a basic criterion: each of the crimes counted in the UCR system was thought by someone, either a citizen or a law enforcement officer, to require the attention of the police who would take the appropriate action.

In the past few years criminal victimization surveys have been developed and these surveys produce data which is complementary to the UCR data. These surveys contact individuals by phone and ask them whether they or any member of their family has been the victim of a crime over the past year. Victimization surveys contain information on a greater number of criminal incidents than the UCR system because victims are asked to describe all incidents, both those which were reported to the police as well as those incidents which were not reported to the police. Victimization surveys contain methodological features which preclude information on homicide, kidnapping, "victimless" crimes, infrequent criminal events, crimes committed against commercial or public property as well as crimes committed against persons under sixteen years of age. In general, the relationship between victimization survey results and official police statistics is still being defined but these two survey methods produce different statistical perspectives on the same general phenomenon.

UCR COUNTING PROCEDURES

The data elements in the UCR data collection system are divided into two parts: the first part is concerned with the counting of offences; the second with the counting of the persons associated with those offences. It is appropriate to discuss the offence part of the data collection system first.

THE OFFENCE: THE BASIC UNIT OF COUNT

The UCR counting process is initiated by the fact that a criminal incident is either brought or naturally comes to the attention of the police. The investigating police complete an occurrence report which forms the basis of the reporting system.

The information contained in the occurrence report is used to determine both the nature and the number of offences in the incident. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. (There are standard rules for determining the most serious offence if the crimes in the incident are of the same general order of severity.) The determination of the number of offences which have occurred in a particular criminal incident is dependent on the nature of the crimes committed. For violent crimes (homicide, attempted murder, assault, sexual offences, and abduction), the number of offences recorded is equal to the number of victims in the incident. (If one person murders three people, then three offences are recorded, but if three people murder one person, only one offence is recorded.) For non-violent crimes, the number of offences recorded is equal to the number of distinct or separate incidents. For example, in an incident where several privately owned vehicles parked in one block are all spray painted with what appears to be paint from the same spray can, it is concluded that one incident occurred and therefore one offence, mischief/property damage, is recorded. A Uniform Crime Reporting Manual with a detailed description of the scoring rules is made available to all of the respondents and training sessions are conducted at regular intervals.

There are important ramifications which result from these basic scoring rules. The Most Serious Offence (MSO) rule means that the total number of offences is equal to the number of victims of violent crimes plus the number of separate incidents of property and other crimes. This means that the number of UCR offences is clearly not a census of all crimes or violations of the law which come to the attention of the police.

Because violent and property crimes are scored differently, these two types of offence data are disparate and comparisons between them should be made with caution.

The application of the MSO rule will also tend to underestimate the true incidence of relatively less serious crimes which come to the attention of the police because these crimes are counted only when they do not occur in conjunction with a more serious crime in the same incident.

REPORTED AND ACTUAL OFFENCES: THE PROCESS OF UNFOUNDING

When a member of the public calls the police with a report that a crime has been committed, the offence is recorded as a "reported" offence. These reported offences are subject to a preliminary investigation which determines the validity of the report. Occasionally, offences reported to the police have not happened or been attempted; these offences are recorded as "unfounded". For example, a car which is reported stolen may turn out to have been borrowed by another family member.

Unfounded offences are subtracted from the number of reported offences to produce the number of "actual" offences. The actual number of offences is the category most frequently utilized.

In this publication, number of offences always refers to actual, rather than reported, offences.

THE CLEARANCE OF ACTUAL OFFENCES

Actual offences are investigated and evidence is gathered. In British Columbia when the police have identified at least one offender in relation to an offence, a Report to Crown Counsel (RCC) is completed and forwarded to the local Crown Counsel office; in other words, the police, are recommending to the Crown that the alleged offender be charged with at least one offence. From a statistical point of view, the recommendation to charge means that at least one actual offence can be "cleared by charge", and this can happen even though the accused has not been apprehended by the police.

Sometimes the police cannot recommend a charge, even though they feel they have identified the offender and have enough evidence to support a charge. This would happen, for example, in a case of diplomatic immunity, or if a victim refuses to sign a complaint, or if an alleged offender dies before he/she can be formally charged. Such offences are considered to be solved but are identified separately as "cleared otherwise", that is, other than by completing an RCC recommending that Crown Counsel charge the offender.

It should be noted that more than one actual offence can be "cleared" by the completion of one RCC. Furthermore, the charges which are recommended by the police need not include the most serious violation in the incident as recorded in the UCR system.

While data on clearance of offences is contained within the Police Services' UCR database, there are no reports in this publication which contain this data.

THE ELEMENT OF TIME AND UCR COUNTING

UCR data are reported monthly by each of the reporting police departments and are available on this basis to interested users. An incident is recorded into the UCR system against the month in which it comes to the attention of police, regardless of when the incident actually took place.

Since the process of solving a crime is a time consuming one, it often happens that a criminal incident is solved, and thus cleared, in a month (or even a year) later than the month in which the incident is reported to the police and recorded in the UCR system. This means that there is no exact mathematical relationship between the number of actual offences and the number of cleared offences in any month or even on a yearly basis. It is theoretically possible to have a greater number of "cleared offences" than "actual offences", although this rarely happens in practice except in the case of monthly reports of relatively infrequent crime types such as homicide.

COUNTING PERSONS IN THE UCR DATA COLLECTION SYSTEM

In addition to recording the number of offences and number of offences cleared, the UCR system also counts the persons who are associated with these offences. When an offence is cleared by charge, a count is kept of the persons who are charged. These "persons charged" are subdivided into "adults charged" and "juveniles charged", and each of these two categories are further subdivided into male and female. It should be noted that in this publication reference to "persons charged" means persons "recommended for charge by the police".

The data element of "persons charged" reflects the number of people against whom legal actions were recommended by the police, but does not count the total number of charges which were actually recommended by police or actually laid by Crown Counsel against these persons. A person who is simultaneously recommended for charge with more than one offence is counted only once against the most serious offence, even if the offences occurred in more than one incident. There is no information regarding the total number of charges recommended, which means that correlations with Court data are difficult.

In addition, persons charged counts do not represent an unduplicated count of individuals "charged" during the year; the same individual is counted on each different occasion that the police recommend a charge against them.

Finally, persons charged data counts those persons who were recommended for charge under the offence category shown, but who may actually have been charged with a lesser offence. For example, a person commits an offence of "breaking and entering", but because of stronger evidence, they may be charged with "having stolen goods in their possession". The offence of "breaking and entering" would be scored and the persons data would be scored against the offence of "breaking and entering". In this instance, the offence of "having stolen goods in their possession" would not be scored.

UCR data is collected in an aggregate fashion on a monthly basis from each police department. In the form in which the data are received, it is not possible to identify the characteristics of a particular criminal incident. The aggregate nature of the data means that offence and persons data are irrevocably confounded -- there is no way to apportion the offences to the number of people involved.

~ ~ ~

The above Overview of the Uniform Crime Reporting system is based on the "Introduction" contained in the Canadian Crime Statistics Books published annually by the Canadian Centre for Justice Statistics, Statistics Canada, Ottawa. Excerpts from this Statistics Canada publication have been edited or expanded to directly address the situation in British Columbia.

CRIME TRENDS IN BRITISH COLUMBIA - 1977 TO 1990

In 1990, the number of Criminal Code offences reported in British Columbia increased by 9%, from about 423,000 in 1989 to 461,000 in 1990. However, while the actual number of crimes increased by 9%, this represented only 147 crimes per 1,000 population, an increase of 6% over the 1989 rate of 139.

British Columbia's crime rate (the number of crimes per 1,000 population) increased every year from 1977 to 1982, then remained fairly constant for four years. The crime rate rose again in 1986, but remained relatively stable for another four years. In 1990, the crime rate increased by 6%, rising to 147 per 1,000 population. This is the first appreciable increase in the crime rate since 1986. (Refer to report on page 17.)

Criminal Code offences are divided into crimes against persons, crimes against property, and "other" crimes. Property crimes in 1990 represented 58% of all Criminal Code offences, whereas person or "violent" crimes accounted for only 10% of the total. The remaining 32% represents "other" Criminal Code offences. The report on pages 17 and 18, and the graphs on page 19 show the distribution of these three crime categories over the last fourteen years.

Violent crimes are composed of offences such as murder, attempted murder, sexual and non-sexual assault, robbery, and abduction. In 1990, assault not involving a weapon or serious injury to the victim (Level 1 Assault) accounted for two-thirds of all assaults, and over one-half of total violent crimes. The actual number of violent crimes increased by 8% in 1990 compared to 1989, and has more than doubled since 1977. Similar to the overall crime rate, the number of violent crimes per 1,000 population has not increased at the same rate as the number of actual offences. In 1990, the rate of violent crime increased by only 6%. However, unlike property offences, the increase in both the number and the rate of violent crime did not level off after 1986. The only exception in 1990 is the sexual assault offence category which, for the first time since 1983, showed a decrease. It is hypothesized that the apparent increase in the number and rate of crimes against persons may, in part, reflect an increase in reporting of these types of offences rather than solely an increase in occurrence; it is further conjectured that increased reporting of person offences may be the result of changes to the law as well as changing public attitudes.

Property crimes include offences such as break and enter of a house or residence, theft of motor vehicle, theft from motor vehicle, shoplifting, and fraud. Even though the actual number of property crimes increased by about 18,000 offences or 8% in 1990, the incidence of these types of crimes per 1,000 population has remained stable since the early 1980s.

The remainder of Criminal Code (non-traffic) offences are included in the category "Other" Criminal Code offences, and includes offences such as prostitution, gaming and betting, possession of an offensive weapon, arson, bail violation, disturbing the peace, and mischief and property damage. In 1990 these types of offences increased by about 16,000, or

12%, compared to 1989. This represents an increase of 9% in the rate per 1,000 population. The increase in the number and incidence of these types of crimes is due almost entirely to increases in offences of "mischief and property damage".

In 1990, the crime categories of non-sexual assault, break and enter, motor vehicle thefts, theft from motor vehicles, mischief and vandalism were responsible for most of the increased crime. Of these crimes, motor vehicle theft showed the greatest percentage increase over the previous years. Credit card fraud also showed a large percentage increase although the total number of these offences was small.

In 1990, as in every previous year, the British Columbia crime rate is higher than the national average, and is higher than that reported for other Provinces. While it is higher, the trend in crime in British Columbia parallels the national trend. Since the Canadian Centre for Justice Statistics does not have an audit team which can monitor the scoring of UCR data in each jurisdiction, and since no comparative studies in provincial crime rates have ever been conducted, we have no satisfactory explanation for the fact that British Columbia has the highest crime rate in Canada. (Within British Columbia, UCR data is audited to ensure that each police force reports crime in a consistent manner.)

Crime rate is defined as the number of Criminal Code offences (excluding Criminal Code traffic offences) per resident population, and is a reasonably accurate indicator of the trend in the incidence of criminal activity in the Province. Caution should be used, however, when comparing the crime rates of various municipal or provincial policing jurisdictions. Rather than indicating that one location has a higher incidence of crime than another, the variations are often a reflection of the jurisdictional boundaries. For example, a municipality with a higher than average crime rate usually has a large population residing outside its municipal boundaries. If that municipality is combined with the residential areas surrounding it, the crime rate for the combined area is usually considerably lower. Examples of this so-called "core city syndrome" are Victoria, Williams Lake, and Vernon. By the same token, crime rates as an indicator of the relative safety of a particular community may also be misleading. In fact, any analysis of crime rates must acknowledge the fact that the police services delivered to every part of the Province provide a high level of protection to all residents and property, and that every community in British Columbia is a safe place to live.

The number of federal drug offences, other federal statute offences, provincial statute offences, municipal bylaw infractions, as well as traffic offences often reflect enforcement practices as opposed to the incidence of these offences. For example, changes in the number of drug offences or the number of impaired driving offences does not necessarily mean there was a corresponding increase or decrease in drug use or impaired driving.

For further information on crime trends in British Columbia, please contact the Police Services Branch (Vancouver Office), Ministry of Solicitor General, Suite 207, 815 Hornby Street, Vancouver, British Columbia, V6Z 2E6, Telephone: 660-2604.

FOOTNOTE

(1) In 1989 the responsibility for highway patrol functions was transferred from a number of Provincial Detachments to Subdivision Headquarters, resulting in a respective decrease and increase of authorized strength for each. In 1990, responsibility for telecommunication functions was transferred from Subdivision Headquarters to Provincial Force Headquarters, resulting in a respective decrease and increase of authorized strength for each.

DATA QUALIFIERS

1. Authorized strength is based on the authorized strength as of December 31st of each calendar year. Authorized strength includes all sworn members, and in the case of the RCMP, sworn civilian members (CMs). In 1990 there were 7 CMs in "E" Division Administration, 41 CMs in the Federal Force, and 198 CMs in the RCMP Provincial Force. These figures do not include non-sworn civilian support staff. Included in the authorized strength of RCMP Subdivision Headquarters are units dedicated to freeway patrol; in 1990 there were 67 authorized positions assigned to these units.
2. The authorized strength of the RCMP is obtained from the EO-5 Report dated December 31st of each calendar year.
3. The RCMP Provincial Force polices all municipalities under 5,000 population as well as all unincorporated areas in the Province. However, seven municipalities which exceeded 5,000 population after the 1981 Canada Census, and an eighth which incorporated and was over 5,000 population, have continued to be policed by the Provincial Force on a fee for service basis. The authorized strength of these eight municipalities is included in the RCMP Provincial Force figures.
4. In British Columbia, municipalities become responsible for the provision of municipal police services when the Canada Census indicates that their population exceeds 5,000. In British Columbia there are 12 municipalities which have formed their own "independent" police departments, and 43 which contract with the RCMP for municipal police services. In addition, there are eight municipalities which contract with the Province to be policed by the RCMP Provincial Force on a fee for service basis; the authorized strength of these eight municipalities is included in the RCMP Provincial Force figures.
5. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

DATE: September 24, 1991.

BRITISH COLUMBIA: CONTRIBUTION TO POLICING BY MUNICIPAL, PROVINCIAL AND FEDERAL GOVERNMENTS IN FISCAL YEAR 1990/91.

TYPE OF FORCE	POPULATION POLICED IN 1990	TOTAL POLICE COSTS PAID BY:			
		MUN GOVT	PROV GOVT	FED GOVT	TOTAL
12 INDEPENDENT MUNICIPAL FORCES	923,488	$138,699,310	0	0	$138,699,310
23 RCMP MUNICIPAL FORCES Over 15,000 Pop (1)	1,323,909	$137,006,448	0	$11,944,090	$148,950,538
20 RCMP MUNICIPAL FORCES 5,000 to 15,000 Pop (1)	199,522	$ 20,720,374	0	$ 6,461,397	$27,181,771
RCMP PROVINCIAL FORCE:(2)					
8 "Extended" Muns	64,073	$ 3,570,610	$94,445,115	$42,006,740	$140,022,465
82 Muns under 5,000 Pop	158,864	0			
Unincorporated Areas	461,844	Partial			
TOTAL	3,131,700	$299,996,742	$94,445,115	$60,412,227	$454,854,084

FOOTNOTES

(1) The groupings for the RCMP municipal forces over and under 15,000 population are based on the 1986 Canada Census figures, not on the 1990 estimates given in the column at right.

(2) The final figures for the provincial and federal share of actual costs for the RCMP Provincial Force for fiscal year 1990/91 are subject to minor adjustments, pending a final reconciliation.

DATA QUALIFIERS

1. All expenditure figures shown above for the federal and provincial governments, as well as the 8 municipalities with "extended" RCMP contracts, represent the costs paid in fiscal year 1990/91. The expenditure figures for municipalities with independent and RCMP municipal forces represent the costs paid by them in calendar year 1990.
2. Expenditure figures for the 43 municipalities with RCMP municipal forces include both the contract costs, and those costs paid by the municipality which are over and above the contract costs (for example, support staff salaries and benefits, accommodation costs and, where applicable, municipalities with By-law enforcement in their policing budget). Federal government expenditure figures for RCMP municipal policing only represent their share of the contract costs, and exclude costs borne by the federal government which are over and above the contract costs.
3. Seven municipalities became responsible for policing as a result of the 1981 Canada Census. In 1987 as a result of incorporation under the Municipal Act, one additional municipality over 5,000 was created. These eight municipalities contract with the Province for RCMP Provincial Force services on a fee-for-service basis and are called "extended" policing jurisdictions.
4. The 82 municipalities under 5,000 population make no contribution towards their policing services.
5. The unincorporated areas of the Province make no direct contribution towards their policing services. However, part of the rural property tax levy could be considered as partially offsetting their police costs.
6. In 1990/91, the final year of the current 10 year RCMP Policing Agreements, municipalities over 15,000 population were paying 90% of their contract policing costs, and municipalities between 5,000 and 15,000 were paying 70% of their contract costs. In the same year the Province was paying 70% of provincial policing costs.

FOOTNOTES

(1) Criminal Code Total includes Criminal Code: Person, Property and Other offences. Criminal Code: Person offences include "violent" crimes such as homicide, attempted murder, sexual and non-sexual assault, robbery and abduction. Criminal Code: Property offences include break and enter, motor vehicle theft, theft over and less than $1000, fraud and possession of stolen property. Criminal Code: Other offences include prostitution, gaming and betting, possession of offensive weapons, as well as arson, bail violations, disturb the peace, and mischief and property damage. Criminal Code: Traffic offences are not included in Criminal Code Total.

(2) Vancouver City persons charged data for the last six months of 1990 is not currently available. As a result, estimates for Vancouver City data for that reporting period have been made and are included in the British Columbia figures shown.

DATA QUALIFIERS

1. The offence and persons charged data contained in this report have been recorded by the police on the Uniform Crime Reporting Survey (UCR). Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences where one incident with multiple victims is scored as one offence, police record one offence for every victim of a "violent" crime, i.e. homicide, attempted murder, sexual and non-sexual assault and abduction.

2. Number of Offences represents only those offences reported to, or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.

3. Number of Persons Charged counts the number of people for whom the police have filed a Report to Crown Counsel (RCC) alleging responsibility for an offence; it does not necessarily imply the swearing of an information against, or the prosecution or conviction of an individual. Crown Counsel may return the case to police due to insufficient evidence, take no further action, or in the case of young offenders (juveniles), issue a letter of caution or approve alternative measures. Number of Persons Charged includes male and female adults, as well as juvenile males and females. In British Columbia, under the provisions of the Young Offenders Act, a juvenile is defined as any individual under 18 years and over 11 years of age. Estimates of Vancouver City data are included in persons charged data shown for 1990 [FN(2)].

4. Population figures are based on the results of Canada Census which is conducted every five years. The most recent Canada Census occurred in 1986. Population figures for intervening years are estimates based on Census data.

5. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES

(1) Total Homicide includes four UCR offence categories: Murder, 1st Degree and 2nd Degree, Manslaughter, and Infanticide.

(2) From 1983 onward, Total Sex Offences includes four UCR offence categories: Aggravated Sex Assault - Level 3, Sex Assault With Weapon - Level 2, Sex Assault - Level 1, and Total Other Sex Offences. Total Other Sex Offences include sexual interference, invitation to sexual touching, sexual exploitation, incest, etc. Indecent Acts such as flashing or public exposure are not included in Total Other Sex Offences. Prior to January 1983, Total Sex Offences included Rape, Indecent Assault - Female, Indecent Assault - Male, and Other Sex Offences.

(3) From 1983 onward, Total Assaults - Non Sex includes eight UCR offence categories: Assault - Level 1, Assault With Weapon/Causing Bodily Harm - Level 2, Aggravated Assault - Level 3, Unlawful Bodily Harm, Shoot With Intent, Assault Police, Assault Other Officer, and Other Assault . Other Assault includes poisoning, torture, etc. Prior to 1983, Total Assaults - Non Sex included Wounding, Bodily Harm, Assault Police, Assault - Other Peace/Public Officer, and Other Assaults.

(4) Total Robbery includes three UCR offence categories: Robbery With Firearms, Robbery With Other Offensive Weapon, and Other Robbery. Other Robbery includes assault with intent to steal, or stopping mail with intent to rob or search it, etc.

(5) Total Abduction, which came into effect January 1983, includes four UCR offence categories: Abduction - Under 14, Abduction - Under 16, Abduction - Contravening Custody Order, and Abduction - No Custody Order.

(6) Vancouver City persons charged data for the last six months of 1990 is not currently available. As a result, estimates for Vancouver City data for that reporting period have been made and are included in the British Columbia figures shown.

DATA QUALIFIERS

1. The offence and persons charged data contained in this report have been recorded by the police on the Uniform Crime Reporting Survey (UCR). Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences where one incident with multiple victims is scored as one offence, police record one offence for every victim of a "violent" crime, i.e. Criminal Code - Person offences.

2. Number of Offences represents only those offences reported to, or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.

3. Number of Persons Charged counts the number of people for whom the police have filed a Report to Crown Counsel (RCC) alleging responsibility for an offence; it does not necessarily imply the swearing of an information against, or the prosecution or conviction of an individual. Crown Counsel may return the case to police due to insufficient evidence, take no further action, or in the case of young offenders (juveniles), issue a letter of caution or approve alternative measures. Number of Persons Charged includes male and female adults, as well as juvenile males and females. In British Columbia, under the provisions of the Young Offenders Act, a juvenile is defined as any individual under 18 years and over 11 years of age. Estimates of Vancouver City data are included in persons charged data shown for 1990 [FN(6)].

4. Population figures are based on the results of Canada Census which is conducted every five years. The most recent Canada Census occurred in 1986. Population figures for intervening years are estimates based on Census data.

5. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES

(1) Prior to January 1983, Sex Offence categories consisted of: Rape, Indecent Assault - Female, Indecent Assault - Male and Other Sex offences; in January 1983, these categories were replaced by: Sex Assault - Level 1, Sex Assault with Weapon - Level 2, Aggravated Sex Assault - Level 3, and Total Other Sex Offences.

(2) Prior to January 1983, Assault Offence categories consisted of: Wounding, Bodily Harm, Police, Other Peace - Public Officer and Other Assaults; in January 1983 these categories were replaced by: Assault - Level 1, Assault with Weapon or Causing Bodily Harm - Level 2, Aggravated Assault - Level 3, Unlawful Bodily Harm, Shoot With Intent, Assault Police, Assault Other Officers, and Other Assault.

(3) UCR Abduction Offence categories came into effect January 1983.

(4) Theft Offences are the sum of the UCR offence categories referred to as "Theft Over" and "Theft Less Than". The figures shown here represent the total of Bicycle Theft Over $1000 and Bicycle Theft Less Than $1000; Theft from Motor Vehicle Over $1000 and Theft from Motor Vehicle Less Than $1000; Shoplifting Over $1000 and Shoplifting Less Than $1000; Other Theft Over $1000 and Other Theft Less Than $1000; and Total Theft Over $1000 and Total Theft Less Than $1000. It should be noted that these offence categories were changed, in January 1986, from "...Over $200" and "...Less Than $200" to "...Over $1000" and "...Less Than $1000".

FOOTNOTES Cont'd

(5) Mischief and Property Damage is the sum of two UCR offence categories: Mischief and Property Damage Over $1000 and Mischief and Property Damage Less Than $1000; prior to January 1986, these offence categories were: Wilful Damage - Private and Wilful Damage - Public.

(6) On April 2, 1984 the Juvenile Deliquent Act was repealed. The Young Offenders Act (YOA), which describes completely new procedures for dealing with young offenders and re-defines the ages of young offenders, came into effect on the same day. The procedural aspects of the Young Offenders Act were proclaimed on April 2, 1984; however, the age provisions were not proclaimed until April 1985. A juvenile is now defined as under 18 years and over 11 years of age. In British Columbia, prior to April 1985, a juvenile was defined as under 17 years and over 6 years of age.

(7) In December, 1986, the Province proclaimed amendments to the Offence and Motor Vehicle Acts which introduced new summary ticketing procedures for a wide variety of Provincial Statute offences. For example, a new Ticket Information replaced Traffic Ticket Informations under the Motor Vehicle Act, Wildlife Tickets under the Wildlife Act and Litter Tickets under the Litter Act. In addition, this new ticket information could be issued for a number of other Provincial Acts (i.e. Liquor Control and Licensing Act), for which tickets could not be previously used. In 1987, the ability to issue tickets for additional offences under Provincial Statutes, in particular the Liquor Control and Licensing Act, resulted in a substantial increase in the number of offences.

(8) Criminal Code - Property offences include break and enters, motor vehicle thefts, theft, fraud and possession of stolen property.

(9) Criminal Code - Person offences include "violent" crimes such as homicides, attempted murder, sexual and non-sexual assaults, robbery and abduction.

(10) Criminal Code - Other offences include prostitution, gaming and betting, possession of offensive weapons as well as arson, bail violations, disturb the peace, and mischief and property damage.

(11) Criminal Code - Total includes Criminal Code - Property, Person and Other offences.

(12) Federal Drug offences include possession, trafficking, importation, and cultivation of drugs under the Narcotics Control Act, and possession and trafficking of controlled or restricted drugs under the Food and Drug Act.

(13) Provincial Statutes includes all provincial statute offences (i.e. Liquor Control and Licensing Act and Securities Act).

(14) The Grand Total includes all of the foregoing offence categories, as well as Other Federal Statute offences (such as Customs and Excise), and Municipal Bylaw infractions. It should be noted that Criminal Code - Traffic offences and Provincial Statute - Traffic offences are not included in these figures.

(15) Population figures are based on the results of Canada Census which is conducted every five years. The most recent Canada Census occurred in 1986. Population figures for intervening years are estimates based on Census data.

(16) On January 1, 1986, Bill C-49 came into effect. This legislation created the new offence of "communicating for the purposes of prostitution in a public place". As a result, the number of Other Prostitution offences increased substantially, particularly in the City of Vancouver.

(17) From 1987 onward, the increase in number of offences under the Canadian Shipping Act is the result of increased enforcement practices within a number of reporting jurisdictions.

(18) In 1987 Ports Canada Police incorrectly scored "routine vessel inspections" as Other Federal Statute offences. As a result, the number of offences for 1987 is inflated by approximately 2,000 offences. In 1989 as a result of increased enforcement practices within a number of reporting jurisdictions, the number of Other Federal Statute offences increased.

(19) From 1985 to 1987 the City of Vancouver incorrectly scored "Breach of Probation Order" offences under the Young Offenders Act. These offences, which were scored to Other Criminal Code (Other CC), should have been reported in the Other Federal Statutes category. As a result, data scored against Other Federal Statutes for this period is under-reported by approximately 100 offences per year, while data for Other CC is correspondingly inflated.

(20) In 1989 Richmond Municipal Detachment incorrectly scored approximately 3,600 municipal bylaw parking violations to the Municipal Bylaw - Not Traffic offence category, as well, in 1990 an additional 1,500 offences were incorrectly scored to this offence category. As a result, the number of offences for 1989 and 1990 have been estimated.

(21) In 1989 the increase in the number of offences under Other Federal Statutes is the result of increased statute enforcement practices within a number of reporting jurisdictions, e.g. Richmond Municipal - Aeronautics Act, Hope Provincial - Transportation of Dangerous Goods, and Burns Lake Provincial - Radio Act.

(22) Vancouver City data for the last six months of 1990 is not currently available. As a result, estimates of Vancouver City data for that reporting period have been made and are included in the British Columbia figures shown.

(23) Provincial Statutes - Liquor Act includes offences relating to liquor laws, e.g. licensing, minors in possession, etc. In addition, in 1990, the scoring rules were changed such that all persons detained by the police for being in a "State of Intoxication in a Public Place" (SIPP) were also scored to this offence category. As a result, in 1990, the number of Provincial Statute - Liquor Act offences increased substantially.

DATA QUALIFIERS

1. The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting Survey (UCR). Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious offence is recorded for UCR purposes. However, with the exception of robbery offences where a single incident with more than one victim is scored as only one offence, police score one offence for every victim of a "violent" crime, i.e. homicide, attempted murder, sexual and

DATA QUALIFIERS Cont'd

non-sexual assault, and abduction. Number of Offences represents only those offences reported to, or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained. Furthermore, with respect to so-called "victimless" offences, such as prostitution, or drugs, changes in the number of offences do not necessarily mean there was a corresponding increase or decrease in the occurrence of these types of offences. It may, in fact, reflect changes in police enforcement practices. Estimates of Vancouver City data are included in federal, provincial and municipal statute offence data shown for 1990 [FN(22)].

2. Appendix A contains a Table of Concordance listing the sections of the Criminal Code and other federal statutes which are included in UCR crime and drug offence categories.

3. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest at the latest date will reflect the most current data available.

FOOTNOTES

(1) Prior to January 1983, Sex Offence categories consisted of: Rape, Indecent Assault - Female, Indecent Assault - Male and Other Sex offences; in January 1983, these categories were replaced by: Sex Assault - Level 1, Sex Assault with Weapon - Level 2, Aggravated Sex Assault - Level 3, and Total Other Sex Offences.

(2) Prior to January 1983, Assault Offence categories consisted of: Wounding, Bodily Harm, Police, Other Peace - Public Officer and Other Assaults; in January 1983 these categories were replaced by: Assault - Level 1, Assault with Weapon or Causing Bodily Harm - Level 2, Aggravated Assault - Level 3, Unlawful Bodily Harm, Shoot With Intent, Assault Police, Assault Other Officers, and Other Assault.

(3) UCR Abduction Offence categories came into effect January 1983.

(4) Theft Offences are the sum of the UCR offence categories referred to as "Theft Over" and "Theft Less Than". The figures shown here represent the total of Bicycle Theft Over $1000 and Bicycle Theft Less Than $1000; Theft from Motor Vehicle Over $1000 and Theft from Motor Vehicle Less Than $1000; Shoplifting Over $1000 and Shoplifting Less Than $1000; Other Theft Over $1000 and Other Theft Less Than $1000; and Total Theft Over $1000 and Total Theft Less Than $1000. It should be noted that these offence categories were changed, in January 1986, from "...Over $200" and "...Less Than $200" to "...Over $1000" and "...Less Than $1000".

FOOTNOTES Cont'd

(5) Mischief and Property Damage is the sum of two UCR offence categories: Mischief and Property Damage Over $1000 and Mischief and Property Damage Less Than $1000; prior to January 1986, these offence categories were: Wilful Damage - Private and Wilful Damage - Public.

(6) On April 2, 1984 the Juvenile Deliquent Act was repealed. The Young Offenders Act (YOA), which describes completely new procedures for dealing with young offenders and re-defines the ages of young offenders, came into effect on the same day. The procedural aspects of the Young Offenders Act were proclaimed on April 2, 1984; however, the age provisions were not proclaimed until April 1985. A juvenile is now defined as under 18 years and over 11 years of age. In British Columbia, prior to April 1985, a juvenile was defined as under 17 years and over 6 years of age.

(7) In December, 1986, the Province proclaimed amendments to the Offence and Motor Vehicle Acts which introduced new summary ticketing procedures for a wide variety of Provincial Statute offences. For example, a new Ticket Information replaced Traffic Ticket Informations under the Motor Vehicle Act, Wildlife Tickets under the Wildlife Act and Litter Tickets under the Litter Act. In addition, this new ticket information could be issued for a number of other Provincial Acts (i.e. Liquor Control and Licensing Act), for which tickets could not be previously used. In 1987, the ability to issue tickets for additional offences under Provincial Statutes, in particular the Liquor Control and Licensing Act, resulted in a substantial increase in the number of offences and persons charged data, as well as a corresponding increase in the rate per 1000 population.

(8) Criminal Code - Property offences include break and enters, motor vehicle thefts, theft, fraud and possession of stolen property.

(9) Criminal Code - Person offences include "violent" crimes such as homicides, attempted murder, sexual and non-sexual assaults, robbery and abduction.

(10) Criminal Code - Other offences include prostitution, gaming and betting, possession of offensive weapons as well as arson, bail violations, disturb the peace, and mischief and property damage.

(11) Criminal Code - Total includes Criminal Code - Property, Person and Other offences.

(12) Federal Drug offences include possession, trafficking, importation, and cultivation of drugs under the Narcotics Control Act, and possession and trafficking of controlled or restricted drugs under the Food and Drug Act.

(13) Provincial Statutes includes all provincial statute offences (i.e. Liquor Control and Licensing Act and Securities Act).

(14) The Grand Total includes all of the foregoing offence categories, as well as Other Federal Statute offences (such as Customs and Excise), and Municipal Bylaw infractions. It should be noted that Criminal Code - Traffic offences and Provincial Statute - Traffic offences are not included in these figures.

(15) Population figures are based on the results of Canada Census which is conducted every five years. The most recent Canada Census occurred in 1986. Population figures for intervening years are estimates based on Census data.

(16) On January 1, 1986, Bill C-49 came into effect. This legislation created the new offence of "communicating for the purposes of prostitution in a public place". As a result, number of Other Prostitution offences increased substantially, particularly in the City of Vancouver; the rate per 1000 population increased correspondingly.

(17) From 1987 onward, the increase in number of offences and the rates per 1000 population under the Canadian Shipping Act is the result of increased enforcement practices within a number of reporting jurisdictions.

(18) In 1987 Ports Canada Police incorrectly scored "routine vessel inspections" as Other Federal Statute offences. As a result, the number of offences for 1987 is inflated by approximately 2,000 offences, with the rate per 1000 population being similarly affected. In 1989 as a result of increased enforcement practices within a number of reporting jurisdictions, the number of Other Federal Statute offences increased; the rate per 1000 population increased correspondingly.

(19) From 1985 to 1987 the City of Vancouver incorrectly scored "Breach of Probation Order" offences under the Young Offenders Act. These offences, which were scored to Other Criminal Code (Other CC), should have been reported in the Other Federal Statutes category. As a result, data scored against Other Federal Statutes for this period is under-reported by approximately 100 offences per year, while data for Other CC is correspondingly inflated; rates per 1000 population for each offence category were similarly affected.

(20) In 1989 Richmond Municipal Detachment incorrectly scored approximately 3,600 municipal bylaw parking violations to the Municipal Bylaw - Not Traffic offence category, as well in 1990 an additional 1,500 offences were incorrectly scored to this offence category. As a result, the number of offences for 1989 and 1990 have been estimated; the rates per 1000 population are based upon these estimates.

(21) In 1989 the increase in the rate per 1000 population under Other Federal Statutes is the result of increased statute enforcement practices within a number of reporting jurisdictions, e.g. Richmond Municipal - Aeronautics Act, Hope Provincial - Transportation of Dangerous Goods, and Burns Lake Provincial - Radio Act.

(22) Vancouver City data for the last six months of 1990 is not currently available. As a result, estimates of Vancouver City data for that reporting period have been made and are reflected in the British Columbia figures; rates per 1000 population are based upon these estimates.

(23) Provincial Statutes - Liquor Act includes offences relating to liquor laws, e.g. licensing, minors in possession, etc. In addition, in 1990, the scoring rules were changed such that all persons detained by police for being in a "State of Intoxication in a Public Place" (SIPP) were also scored to this offence category. As a result, in 1990, the number of Provincial Statute - Liquor Act offences increased substantially; the rate per 1000 population increased correspondingly.

DATA QUALIFIERS

1. The Rates Per 1000 Population contained in this report are generated from total UCR data for British Columbia; they do not represent the average of the rates for each policing jurisdiction in the Province. Furthermore, with respect to so-called "victimless" offences, such as prostitution or drugs, changes in the number of offences, rates, or persons charged data does not necessarily mean there was a corresponding increase or decrease in the occurrence of these types of offences. It may, in fact, reflect changes in police enforcement practices. Estimates of Vancouver City data are reflected in the federal, provincial and municipal statute rates per 1000 population shown for 1990 [FN(22)].

2. Appendix A contains a Table of Concordance listing the sections of the Criminal Code and other federal statutes which are included in UCR crime and drug offence categories.
3. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES

(1) Prior to January 1983, Sex Offence categories consisted of: Rape, Indecent Assault - Female, Indecent Assault Male and Other Sex Offences; in January 1983, these categories were replaced by: Sex Assault - Level 1, Sex Assault with Weapon - Level 2, Aggravated Sex Assault - Level 3, and Total Other Sex Offences.

(2) Prior to January 1983, Assault Offence categories consisted of: Wounding, Bodily Harm, Police, Other Peace - Public Officer and Other Assaults; in January 1983 these categories were replaced by: Assault - Level 1, Assault with Weapon or Causing Bodily Harm - Level 2, Aggravated Assault - Level 3, Unlawful Bodily Harm, Shoot With Intent, Assault Police, Assault Other Officers, and Other Assault.

(3) UCR Abduction Offence categories came into effect January 1983.

(4) Theft Offences are the sum of the UCR offence categories referred to as "Theft Over" and "Theft Less Than". The figures shown here represent the total of Bicycle Theft Over $1000 and Bicycle Theft Less than $1000; Theft from Motor Vehicle Over $1000 and Theft from Motor Vehicle Less Than $1000; Shoplifting Over $1000 and Shoplifting Less Than $1000; Other Theft Over $1000 and Other Theft Less Than $1000; and Total Theft Over $1000 and Total Theft Less Than $1000. It should be noted that these offence categories were changed, in January 1986, from "...Over $200" and "...Less Than $200" to "...Over $1000" and "...Less Than $1000".

(5) Mischief and Property Damage is the sum of two UCR offence categories: Mischief and Property Damage Over $1000 and Mischief and Property Damage Less Than $1000; prior to January 1986, these offence categories were: Wilful Damage - Private and Wilful Damage - Public.

(6) On April 2, 1984 the Juvenile Deliquent Act was repealed. The Young Offenders Act (YOA), which describes completely new procedures for dealing with young offenders and re-defines the ages of young offenders, came into effect on the same day. The procedural aspects of the Young Offenders Act were proclaimed on April 2, 1984; however, the age provisions were not proclaimed until April 1985. A juvenile is now defined as under 18 years and over 11 years of age. In British Columbia, prior to April 1985, a juvenile was defined as under 17 years and over 6 years of age.

(7) In December 1986, the Province proclaimed amendments to the Offence and Motor Vehicle Acts which introduced new summary ticketing procedures for a wide variety of Provincial Statute offences. For example, a new Ticket Information replaced Traffic Ticket Informations under the Motor Vehicle Act, Wildlife Tickets under the Wildlife Act and Litter Tickets under the Litter Act. addition, this new ticket information could be issued for a number of other Provincial Acts (i.e. Liquor Control and Licensing Act), for which tickets could not previously be used. In 1987, the ability to issue tickets for additional offences under Provincial Statutes, in particular the Liquor Control and Licensing Act, resulted in a substantial increase in number of offences and persons charged data, as well as a corresponding increase in the rate per 1000 population.

(8) Criminal Code - Property offences include break and enters, motor vehicle thefts, theft, fraud, and possession of stolen property.

(9) Criminal Code - Person offences include "violent" crimes such as homicides, attempted murder, sexual and non-sexual assaults, robbery and abduction.

(10) Criminal Code - Other offences include prostitution, gaming and betting, possession of offensive weapons as well as arson, bail violations, disturb the peace, and mischief and property damage.

(11) Criminal Code - Total includes Criminal Code - Property, Person and Other offences.

(12) Federal Drug offences include possession, trafficking, importation, and cultivation of drugs under the Narcotics Control Act, and possession and trafficking of controlled or restricted drugs under the Food and Drug Act.

(13) Provincial Statutes include all provincial statute offences (i.e. Liquor Control and Licensing Act and Securities Act).

(14) The Grand Total includes all of the foregoing offence categories, as well as Other Federal Statute offences (such as Customs and Excise), and Municipal Bylaw infractions. It should be noted that Criminal Code - Traffic offences and Provincial Statute - Traffic offences are not included in these figures.

(15) On January 1, 1986, Bill C-49 came into effect. This legislation created the new offence of "communicating for the purposes of prostitution in a public place". As a result, number of Other Prostitution offences and persons charged data increased substantially, particularly in the City of Vancouver.

FOOTNOTES Cont'd

(16) From 1985 to 1987 the City of Vancouver incorrectly scored "Breach of Probation Order" offences under the Young Offenders Act. These offences, which were scored to Other Criminal Code (Other CC), should have been reported in the Other Federal Statutes category. As a result, data scored against Other Federal Statutes for this period is under-reported by approximately 100 offences per year, while data for Other CC is correspondingly inflated; persons charged data are similarly affected.

(17) In 1985, when the new age provisions of the YOA were proclaimed [FN(6)], persons who were 17 years of age were defined as juveniles; prior to 1985, these individuals were considered adults. Consequently the total number of juveniles charged in 1985 increased while the total number of adults charged decreased. Furthermore, as a result of new Provincial Statute ticketing procedures introduced in December 1986 [FN(7)], both the number of adults and juveniles charged increased from 1987 onward.

(18) From 1987 onward, the increase in the number of persons charged in connection with Canada Shipping Act offences is the result of increased enforcement practices within a number of reporting jurisdictions.

(19) In 1989 the increase in the number of persons charged in connection with Other Federal Statute offences is the result of increased enforcement practices within a number of reporting jurisdictions.

(20) In 1989 Richmond Municipal Detachment incorrectly scored approximately 3,600 municipal bylaw parking violations to the Municipal Bylaw - Not Traffic offence category, as well in 1990 an additional 1,500 offences were incorrectly scored to this offence category. As a result the number of offences for 1989 and 1990 have been estimated; persons charged data is based upon these estimates.

(21) Vancouver City data for the last six months of 1990 is not currently available. As a result, estimates of Vancouver City data for that reporting period have been made and are included in the British Columbia figures shown.

(22) From 1985 to 1990 one reporting jurisdiction incorrectly scored persons charged data for the robbery, theft, fraud, and break and enter offence categories. As a result, within these offence categories, the number of persons charged with Robbery - Other, Theft - Other, Fraud - Other, and Break and Enter - Other are inflated, while the number of persons charged with the remaining offences in each of these categories is under-reported.

(23) Provincial Statutes - Liquor Act includes offences relating to liquor laws, e.g. licensing, minors in possession, etc. In addition, in 1990, the scoring rules were changed such that all persons detained by police for being in a "State of Intoxication in a Public Place" (SIPP) were also scored to this offence category. As a result, in 1990, the number of Provincial Statute - Liquor Act offences increased substantially; persons charged data are similarly affected.

DATA QUALIFIERS

1. The persons charged data shown above have been recorded by the police on the Uniform Crime Reporting Survey (UCR). Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious offence will be scored and reflect persons charged data. Futhermore, with respect to so-called "victimless" offences, such as prostitution and drugs, changes in the number of offences, rates, or persons charged data does not necessarily mean there was a corresponding increase or decrease in the occurrence of these types of offences. It may, in fact, reflect changes in police enforcement practices. Estimates of Vancouver City data are included in persons charged data shown for 1990 [FN(21)].
2. Persons Charged counts the number of people for whom the police have filed a Report to Crown Counsel (RCC) alleging responsibility for an offence; it does not necessarily imply the swearing of an information against, or the prosecution or conviction of an individual. Crown Counsel may return the case to police due to insufficient evidence, take no further action, approve diversion or alternative measures, or in the case of young offenders (juveniles), issue a letter of caution. Number of Adults Charged includes male and female adults; Number of Juveniles Charged includes male and female juveniles; and Total Persons Charged includes male and female adults, as well as juvenile males and females. In British Columbia a juvenile is defined as under 18 years and over 11 years of age; prior to April 1985, a juvenile was defined as under 17 years and over 6 years of age.
3. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES AND DATA QUALIFIERS

(1) The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting Survey (UCR). Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious offence is recorded for UCR purposes. Number of Offences represents only those offences reported to, or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosectuions conducted, informations sworn or convictions obtained. Furthermore, changes in the number of traffic offences does not necessarily mean there was a corresponding increase or decrease in the occurrence of these types of offences, but may, in fact, reflect changes in police enforcement practices.

(2) Bill C-18 came into effect January 1, 1986, thereby creating new Criminal Code Traffic enforcement (TE) categories. As a result, UCR Criminal Code offence categories 108 to 117 were replaced by new UCR offence categories 701 to 716. Although unaffected by federal legislation, Provincial Statute - Traffic and Other Traffic offence categories were renumbered from 112, 114, 118, 119, 120, 121 to 717 - 722 respectively.

(3) In British Columbia if a person is charged with impaired operation and fail or refuse to provide breath or blood sample, both offences will be scored and cleared by charge, but only the most serious offence of impaired operation will reflect persons charged data.

(4) The UCR most serious offence rules does not apply when scoring offences under Offcodes 720, 721, and 722. If there is a variety of offences in one incident then all offences will be scored. As an example, 4 offences would be scored in an incident containing the following violations: speeding, passing on the right, no vehicle registration, and no emergency brake.

(5) Other Provincial Statute Traffic offences, from 1977 to 1988, include "moving" offences for which Traffic Violation Reports (TVRs) were issued, and "non moving" offences for which Ticket Informations (TIs) were issued. TVR offences under the Motor Vehicle Act included speeding, fail to stop at a stop sign, etc., and were usually penalized by the allocation of points against the offender's driver's licence. (In the case of out-of-province drivers a Ticket Information resulting in a fine would have been issued in lieu of a TVR.) TI offences under the Motor Vehicle Act included non moving violations such as failure to produce driver's licence, no vehicle registration, and a variety of violations pertaining to the condition of the vehicle. Each TI and TVR could record a maximum of three offences.

(6) In 1981 the Supreme Court of Canada declared the Criminal Code Traffic section dealing with "no driver's licence/driving while prohibited" unconstitutional. Subsequently these incidents were enforced as provincial statute offences. From 1981 onward, the dramatic increase in the number of Provincial Statute Traffic - Driving While Disqualified offences, and the corresponding decrease in Criminal Code Traffic - Driving While Prohibited offences is explained by this Supreme Court ruling. Since this decision did not repeal any sections of the law, Criminal Code Traffic - Driving While Prohibited offences may still be legitimately occurring, and thus reported to the UCR survey. However, for the most part, "driving while disqualified" is dealt with as a Provincial Statute offence.

(7) Vancouver City data for the last six months of 1990 is not currently available. As a result, estimates of Vancouver City data for that reporting period have been made and are included in the British Columbia figures shown.

(8) The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES

(1) Polcd 707 Chilliwack Mun includes Polcd 708 Chilliwhack Twsp Mun; amalgamated 1980.
(2) Polcd 801 North Cowichan Mun includes Polcd 801 N. Cowichan Mun - Chemainus and Polcd 804 N. Cowichan - Duncan.
(3) Polcd 726 Surrey Mun includes Polcd 739 Surrey Prov.
(4) From 1977 to 1986, Polcd 721 North Vancouver Dist Mun includes Polcd 742 Bowen Island Prov.
(5) Polcd 741 Pitt Meadows Extended includes Polcd 712 Maple Ridge Prov.
(6) Polcd 821 Colwood Extended was opened February 1988.
(7) As a result of the 1981 Canada Census, seven municipalities - Coldstream, Fernie, North Saanich, Parksville, Pitt Meadows, Port Hardy and Revelstoke - exceeded 5,000 population for the first time. In 1987 as a result of incorporation under the Municipal Act, Colwood Municipality was created with a population exceeding 5,000. Pursuant to the Police Act and the Municipal Act, these municipalities became responsible for policing when their populations exceeded 5,000. Instead of contracting for RCMP Municipal police services, it was agreed that the Provincial Force would extend police services to these eight municipalities on a fee for service basis, and the municipalities would reimburse the Province for the Provincial Force police services they received.
(8) Crime rate calculated for 1990 is considered preliminary and subject to adjustments.

DATA QUALIFIERS

1. Crime rate is defined as the number of Criminal Code offences (Excluding Traffic) per 1000 population. It is based on the number of crimes occurring within each jurisdiction and on the resident population. Crime rate is based on a population which excludes tourists, commuters, or "part time" residents such as students or cottage/chalet owners. For example, crime rates for municipalities do not take into account the "core city syndrome" in which a number of people spend some part of the day in the city for either business or pleasures purposes, i.e. tourists and commuters.

DATA QUALIFIERS Cont'd

2. Many municipalities exhibit what is commonly referred to as the "core city syndrome". These cities are surrounded by urban or unincorporated areas which have substantial residential populations. As a result, the crime rates would be lower for the combined populated areas than for those municipalities by themselves.

3. The Total Rates shown in the summary table above are generated from the total number of CCC offences and the total populations for Independent, RCMP Municipal and Extended policing jurisdictions. They do not represent the average of the rates for each individual jurisdiction.

4. Crime Rates are only one of the many factors used to determine the strength and organization of a police force. A number of other factors, such as populations, case burdens, size and accessibility of the area to be policed and traffic volume are also taken into consideration.

5. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

PREPARED BY: Police Services Branch, Ministry of Solicitor General
Province of British Columbia.

DATE: August 13, 1991.

MUNICIPAL POLICING JURISDICTIONS IN BRITISH COLUMBIA: NUMBER OF CRIMINAL CODE OFFENCES (EXCLUDING TRAFFIC), 1977 TO 1990.

FOOTNOTES

(1) Polcd 707 Chilliwack Mun includes Polcd 708 Chilliwhack Twsp Mun; amalgamated 1980.

(2) Polcd 801 North Cowichan Mun includes Polcd 801 N. Cowichan Mun - Chemainus and Polcd 804 N. Cowichan Mun - Duncan.

(3) Polcd 726 Surrey Mun includes Polcd 739 Surrey Prov.

(4) From 1977 to 1986, Polcd 721 North Vancouver District Mun includes Polcd 742 Bowen Island Prov.

(5) Polcd 741 Pitt Meadows Extended includes Polcd 712 Maple Ridge Prov.

(6) Polcd 821 Colwood Extended was opened February 1988.

(7) As a result of the 1981 Canada Census, seven municipalities - Coldstream, Fernie, North Saanich, Parksville, Pitt Meadows, Port Hardy and Revelstoke - exceeded 5,000 population for the first time. In 1987 as a result of incorporation under the Municipal Act, Colwood Municipality was created with a population exceeding 5,000. Pursuant to the Police Act and the Municipal Act, these municipalities became responsible for policing when their populations exceeded 5,000. Instead of contracting for RCMP Municipal police services, it was agreed that the Provincial Force would extend police services to these eight municipalities on a fee for service basis, and the municipalities would reimburse the Province for the Provincial Force police services they received.

(8) Data shown for 1990 is considered preliminary and subject to adjustments.

DATA QUALIFIERS

1. The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting Survey (UCR). Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences where one incident with multiple victims is only scored as one offence, police record one offence for every victim of a violent crime, e.g. homicide, attempted murder, sexual and non-sexual assault, and abduction. Number of Criminal Code Offences represents only those Criminal Code offences reported to, or coming to the attention of police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.

DATA QUALIFIERS Cont'd

2. Number of Criminal Code Offences includes Criminal Code - Person, Property and Other offences. Criminal Code - Person offences include "violent" crimes such as homicide, attempted murder, sexual and non-sexual assault, robbery and abduction. Criminal Code - Property offences include break and enter, motor vehicle theft, theft over and less than $1000, fraud and possession of stolen property. Criminal Code - Other offences include prostitution, gaming and betting, possession of offensive weapons, as well as arson, bail violations, disturb the peace, and mischief and property damage. Criminal Code - Traffic offences are not included in Number of Criminal Code Offences.

3. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTE

(1) Population figure includes municipal and Indian Reserve populations.
(2) Offence, crime rate and case burden data shown for 1990 is considered preliminary and subject to adjustments.

DATA QUALIFIERS

1. Population figures are based on the Canada Census which is conducted every five years. The most recent Canada Census occurred in 1986. Population figures for intervening years are estimates based on Census data. Population figures reflect the "resident" or "late night" population of an area.

2. Authorized police strength is based on the authorized police strength as of December 31, 1990. The authorized strength of the RCMP is obtained from an EO-5 Report. The authorized strength of the independent jurisdictions is collected annually from each department.

DATA QUALIFIERS Cont'd

3. The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting Survey (UCR). Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences where one incident with multiple victims is scored as one offence, police record one offence for every victim of a "violent" crime, e.g. homicide, attempted murder, sexual and non-sexual assault, and abduction. Total CCC Offences represents only those offences reported to, or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.

4. Total CCC Offences include Criminal Code - Property, Person and Other offences. Criminal Code - Property offences include break and enters, motor vehicle thefts, theft over and less than $1000, fraud, and possession of stolen property. Criminal Code - Person offences include violent crimes such as homicides, attempted murder, sexual and non sexual assaults, robbery and abduction. Criminal Code - Other offences include prostitution, gaming and betting, possession of offensive weapons, as well as arson, bail violations, disturb the peace, and mischief and property damage. Criminal Code - Traffic offences are not included in Total CCC Offences.

5. Crime rate is defined as the number of Criminal Code offences (Excl.Traffic) per 1000 population. It is based on the number of crimes occurring within each jurisdiction and on the resident population. Crime rate is based on a population which excludes tourists, commuters, or "part time" residents such as students or cottage/chalet owners. For example, crime rates for municipalities do not take into account the "core city syndrome" in which a number of people spend some part of the day in the city for either business or pleasure purposes, i.e. tourists and commuters.

6. Many municipalities exhibit what is commonly referred to as the "core city syndrome". These cities are surrounded by urban or unincorporated areas which have substantial residential populations. As a result, the crime rates would be lower for the combined populated areas than for those municipalities by themselves.

7. Criminal Code Case Burden is defined as the number of Criminal Code offences (Excl.Traffic) per authorized police strength. The total number of Criminal Code offences and the authorized police strength as of December 31, 1990 are used to calculate case burden.

8. Comparisons between the case burdens of independent municipal forces and RCMP municipal and extended forces may be erroneous due to differences in the organizational structures of the RCMP and Independent municipal forces. The RCMP municipal and extended forces may have a relatively lower sworn strength because of the administrative support provided by "E" Division Headquarters.

9. Populations, crime rates and case burdens are only three of the many factors used to determine the strength and organization of a police force. A number of other factors, such as size, and accessibility of the area to be policed, and traffic volume are also taken into consideration.

10. Summary data and statistics for the Independent, RCMP Municipal and Extended Forces are shown as the last line of each Table. The Criminal Code case burden, and crime rate are generated from the totals, and do not represent the average of the rates for each individual jurisdiction.

11. There may be some small variance in the data contained in this report as compared to previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES

(1) Polcd 707 Chilliwack Mun includes Polcd 708 Chilliwhack Twsp Mun; amalgamated 1980.
(2) Polcd 801 North Cowichan Mun includes Polcd 801 N. Cwn Mun - Chemainus and Polcd 804 N. Cwn Mun - Duncan.
(3) Polcd 726 Surrey Mun includes Polcd 739 Surrey Prov.
(4) From 1977 to 1986, Polcd 721 North Vancouver Dist Mun included Polcd 742 Bowen Island Prov.
(5) Polcd 741 Pitt Meadows Extended includes Polcd 712 Maple Ridge Prov.
(6) Polcd 821 Colwood Extended as opened February 1988.
(7) As a result of the 1981 Canada Census, seven municipalities - Coldstream, Fernie, North Saanich, Parksville, Pitt Meadows, Port Hardy and Revelstoke - exceeded 5,000 population for the first time. In 1987 as a result of incorporation under the Municipal Act, Colwood Municipality was created with a population exceeding 5,000. Pursuant to the Police Act and the Municipal Act, these municipalities became responsible for policing when their populations exceeded 5,000. Instead of contracting for RCMP Municipal police services, it was agreed that the Provincial Force would extend police services to these eight municipalities on a fee for service basis, and the municipalities would reimburse the Province for the Provincial Force police services they received.
(8) Rates calculated for 1990 are considered preliminary and subject to adjustments.

DATA QUALIFIERS

1. Total Break and Enter includes three UCR offence categories: Break and Enter - Business Premise, Residence, and Other. Break and Enter - Business Premise includes offences where a business premise (i.e. warehouse, store, shop, etc) is broken into. Break and Enter - Residence includes offences involving homes, summer cottages, mobile homes, etc. Break and Enter - Other includes all other break and enter offences, i.e. trains, box-cars, locked storage areas, "piggy-backs", and unattached trailers, etc.

DATA QUALIFIERS Cont'd

2. The incidence of break and enter crimes is defined as the number of break and enter offences per 1000 population. It is based on the number of break and enter offences occurring within each jurisdiction and on the resident population. Rates per 1000 population are based on a population which excludes tourists, commuters, or "part time" residents such as students or cottage/chalet owners.

3. The Municipal Total Rate Per 1000 Population shown in the above table is generated from summary data and statistics; it does not represent the average of the rates for each individual jurisdiction.

4. The data contained in this report may vary when compared with previous reports prepared by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

PREPARED BY: Police Services, Ministry of Solicitor General
Province of British Columbia.

DATE: August 20, 1991.

BRITISH COLUMBIA MUNICIPAL POLICING JURISDICTIONS: BREAK & ENTER - TOTAL, NUMBER OF OFFENCES, 1977 TO 1990.

FOOTNOTES

(1) Polcd 707 Chilliwack Mun includes Polcd 708 Chilliwhack Twsp Mun; amalgamated 1980.
(2) Polcd 801 North Cowichan Mun includes Polcd 801 N. Cwn Mun-Chemainus and Polcd 804 N. Cwn Mun-Duncan.
(3) Polcd 726 Surrey Mun includes Polcd 739 Surrey Prov.
(4) From 1977 to 1986, Polcd 721 North Vancouver Dist Mun included Polcd 742 Bowen Island Prov.
(5) Polcd 741 Pitt Meadows Extended includes Polcd 712 Maple Ridge Prov.
(6) Polcd 821 Colwood Extended was opened February 1988.
(7) As a result of the 1981 Canada Census, seven municipalities - Coldstream, Fernie, North Saanich, Parksville, Pitt Meadows, Port Hardy and Revelstoke - exceeded 5,000 population for the first time. In 1987 as a result of incorporation under the Municipal Act, Colwood Municipality was created with a population exceeding 5,000. Pursuant to the Police Act and the Municipal Act, these municipalities became responsible for policing when their populations exceeded 5,000. Instead of contracting for RCMP Municipal police services, it was agreed that the Provincial Force would extend police services to these eight municipalities on a fee for service basis, and the municipalities would reimburse the Province for the Provincial Force police services they received.
(8) Data shown for 1990 is considered preliminary and subject to adjustments.

DATA QUALIFIERS

1. Total Break and Enter includes three UCR offence categories: Break and Enter - Business Premise, Residence and Other. Break and Enter - Business Premise includes offences where a business premise (i.e. warehouse, store, shop, etc) is broken into. Break and Enter - Residence includes offences involving homes, summer cottages, mobile homes, etc. Break and Enter - Other includes all other break and enter offences, i.e. trains, box-cars, "piggy-backs", locked storage areas and unattached trailers, etc.

DATA QUALIFIERS Cont'd

2. The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting Survey (UCR). Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. Number of offences represents only those offences reported to, or coming to the attention of police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.

3. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

SOURCE: Uniform Crime Reporting Survey (UCR).

FOOTNOTES

(1) Polcd 707 Chilliwack Mun includes Chilliwhack Twshp Mun; amalgamated 1980.
(2) Polcd 801 North Cowichan Mun includes Polcd 801 North Cowichan Mun - Chemainus and Polcd 804 North Cowichan Mun - Duncan.
(3) Polcd 726 Surrey Mun includes Polcd 739 Surrey Prov.
(4) Population figures include municipal and Indian Reserve populations.
(5) From 1977 to 1986, Polcd 721 North Vancouver District Municipal includes Polcd 742 Bowen Island Prov.
(6) Polcd 741 Pitt Meadows Extended includes Polcd 712 Maple Ridge Prov.
(7) Polcd 821 Colwood Extended was opened in 1988.
(8) As a result of the 1981 Canada Census, seven municipalities - Coldstream, Fernie, North Saanich, Parksville, Pitt Meadows, Port Hardy, and Revelstoke - exceeded 5,000 population for the first time. In 1987 as a result of incorporation under the Municipal Act, Colwood Municipality was created with a population exceeding 5,000. Pursuant to the Police Act and the Municipal Act, these municipalities became responsible for policing when their populations exceeded 5,000. Instead of contracting for RCMP Municipal police services, it was agreed that the Provincial Force would extend police services to these eight municipalities on a fee for service basis, and the municipalities would reimburse the Province for the Provincial Force police services they received.

DATA QUALIFIERS

1. Population figures are based on the results of Canada Census which is conducted every five years. Canada Census occurred in 1976, 1981, and 1986. Population figures for intervening years are estimates based on these Census data.

DATA QUALIFIERS Cont'd

2. Population figures reflect the "resident" or "late night" population of an area, rather than the number of people who spend some part of the day in the area either for business or pleasure purposes. Furthermore, populations do not take into account "resident non-residents" i.e. cottage/chalet owners or students residing at universities or colleges whose permanent residence is in another jurisdiction.

3. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES

(1) Polcd 304 Crescent Valley Prov was closed in 1987. Area is now included in Polcd 317 Nelson Prov.
(2) Polcd 329 Elkford Prov was opened in 1981.
(3) Crime rate for 1982 is not available.
(4) Polcd 524 Tumbler Ridge Prov was opened in 1983.
(5) Prior to 1987, Polcd 742 Bowen Island Prov was included in Polcd 721 N. Vancouver District Municipal.
(6) Polcd 914 Powell River Prov includes Polcd 924 Texada Island Prov.
(7) From 1983 onward, Polcd 712 Maple Ridge Prov is included in Polcd 741 Pitt Meadows Extended Municipal.

FOOTNOTES Cont'd

(8) Polcd 205 Blue River Prov was closed in 1984.
(9) Polcd 609 Ocean Falls Prov was closed in 1982.

DATA QUALIFIERS

1. Crime rate is defined as the number of Criminal Code offences (Excluding Traffic) per 1000 population. It is based on the number of crimes occurring within each jurisdiction and on the resident population. Crime rate is based on a population which excludes tourists, commuters, or "part time" residents such as students or cottage/chalet owners.

2. The Provincial Force Crime Rate shown in the above table is generated from the total number of Criminal Code offences and total populations for the Provincial Force; it does not represent the average of the rates for each individual jurisdiction.

3. The Provincial Force provides policing services to municipalities under 5,000 population, as well as to the unincorporated areas of the Province. Provincial detachments are usually named after a municipality; however, if a municipality is under 5,000 population the detachment polices not only the municipality but also the unincorporated or rural area surrounding it. If a municipality is over 5,000 population, the detachment polices only the surrounding unincorporated area.

4. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES

(1) Polcd 304 Crescent Valley Prov was closed in 1987. Area is now included in Polcd 317 Nelson Prov.
(2) Data for 1981 is not available.
(3) Data for 1982 is not available.
(4) Polcd 524 Tumbler Ridge Prov was opened in 1983.
(5) Prior to 1987, Polcd 742 Bowen Island Prov was included in Polcd 721 N. Vancouver District Municipal.
(6) Polcd 914 Powell River Prov includes Polcd 924 Texada Island Prov.
(7) From 1983 onward, Polcd 712 Maple Ridge Prov is included in Polcd 741 Pitt Meadows Extended Municipal.

FOOTNOTES Cont'd

(8) Polcd 205 Blue River Prov was closed in 1984.
(9) Polcd 609 Ocean Falls Prov was closed in 1982.

DATA QUALIFIERS

1. The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting (UCR) survey. Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences where a single incident with multiple victims is scored as only one offence, police score one offence for every victim of a violent crime, e.g. homicide, attempted murder, sexual and non-sexual assault, and abduction. Number of Criminal Code Offences represents only those Criminal Code offences reported to, or coming to the attention of police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.

2. Number of Criminal Code Offences includes Criminal Code - Property, Person and Other offences. Criminal Code - Property offences include break and enters, motor vehicle thefts, theft over and less than $1000, fraud, and possession of stolen property. Criminal Code - Person offences include "violent" crimes such as homicides, attempted murder, sexual and non sexual assaults, robbery and abduction. Criminal Code - Other offences include prostitution, gaming and betting, possession of offensive weapons, as well as arson, bail violations, disturb the peace, and mischief and property damage. Criminal Code - Traffic offences are not included in Number of Criminal Code Offences.

3. The Provincial Force provides policing services to municipalities under 5,000 population, as well as to the unincorporated areas of the Province. Provincial detachments are usually named after a municipality; however, if a municipality is under 5,000 population the detachment polices not only the municipality but also the unincorporated or rural area surrounding it. If a municipality is over 5,000 population, the detachment polices only the surrounding unincorporated area.

4. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES

(1) Polcd 914 Powell River Prov includes Polcd 924 Texada Island Prov with an authorized police strength of 2.
(2) Population figure includes municipal and Indian Reserve populations.

DATA QUALIFIERS

1. Population figures are based on the results of Canada Census which is conducted every five years. The most recent Canada Census occurred in 1986. Population figures for intervening years are estimates based on Census data.

DATA QUALIFIERS Cont'd

2. Population figures reflect the "resident" or "late night" population of an area, rather than the number of people who spend some part of the day in the area either for business or pleasure purposes. Furthermore, populations do not take into account "resident non-residents", i.e. cottage/chalet owners or students residing at universities or colleges whose permanent residence is in another jurisdiction.

3. Authorized Police strength is the number of police assigned to general duty and general investigation functions; police strength does not include police assigned to specialized functions, i.e. highway patrol, identification, police service dog.

4. The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting (UCR) Survey. Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences, police score one offence for every victim of a violent crime, i.e. homicide, attempted murder, sexual and non-sexual assault, and abduction. Total CCC Offences represents only those offences reported to, or coming to the attention of police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn, or convictions obtained.

5. Total CCC Offences includes Criminal Code - Property, Person and Other offences. Criminal Code - Property offences include break and enters, motor vehicle thefts, theft over and less than $1000, fraud, and possession of stolen property. Criminal Code - Person offences include "violent" crimes such as homicides, attempted murder, sexual and non-sexual assaults, robbery and abduction. Criminal Code - Other offences include prostitution, gaming and betting, possession of offensive weapons, as well as arson, bail violations, disturb the peace, and mischief and property damage. Criminal Code - Traffic offences are not included in Total CCC Offences.

6. Crime Rate is defined as the number of Criminal Code offences (Excluding Traffic) per 1000 population. It is based on the number of crimes occurring within each jurisdiction and on the resident population. Crime rate is based on a population which excludes tourists, commuters, or "part time" residents such as students or cottage/chalet owners.

7. Criminal Code Case Burden is defined as the number of Criminal Code offences (Excluding Traffic) per authorized police strength (general duty and general investigation functions). The total number of Criminal Code offences and the authorized police strength as of December 31st of each year are used to calculate case burden.

8. Populations, crime rates and case burdens are only three of the many factors used to determine the strength and organization of a police force. A number of other factors, such as size and accessibility of the area to be policed and traffic volume, are also taken into consideration.

9. The Provincial Force provides policing services to municipalities under 5,000 population, as well as to the unincorporated areas of the Province. Provincial detachments are usually named after a municipality; however, if the municipality is under 5,000 population, the detachment polices not only that municipality but also the unincorporated or rural area surrounding it. If the municipality is over 5,000 population, the detachment polices only the surrounding unincorporated area.

10. Data and statistics for the Provincial Force are shown on the last line of the above table. The population and offence data represents the total population policed by the Provincial Force, and the Total Criminal Code offences occurring within each detachment area. The police strength represents the total General Duty and GIS (general investigation section) strength assigned to each provincial detachment; police strength does not include specialized units, or members assigned to Subdivision or "E" Division Headquarters. The Criminal Code case burden and crime rate for the Provincial Force are generated from these totals, and do not represent the average of the rates for individual detachments.

11. The data contained in this report may vary when compared with previous reports produced by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES

(1) Polcd 304 Crescent Valley Prov was closed in 1987.
(2) Polcd 329 Elkford Prov was opened in 1981.
(3) Data for 1982 is not available.
(4) Polcd 524 Tumbler Ridge Prov was opened in 1983.
(5) Prior to 1987, Polcd 742 Bowen Island Prov was included in Polcd 721 N. Vancouver District Municipal.
(6) Polcd 914 Powell River Prov includes Polcd 924 Texada Island Prov.
(7) From 1983 onward, Polcd 712 Maple Ridge Prov is included in Polcd 741 Pitt Meadows Extended Municipal.
(8) Polcd 205 Blue River Prov was closed in 1984.
(9) Polcd 609 Ocean Falls Prov was closed in 1982.

DATA QUALIFIERS

1. Total Break and Enter includes three UCR offence categories: Break and Enter - Business Premise, Residence and Other. Break and Enter - Business Premise includes offences where a business premise (i.e. warehouse, store, shop, etc) is broken into. Break and Enter - Residence includes offences involving homes, summer cottages, mobile homes, etc. Break and Enter - Other includes all other break and enter offences, i.e. trains, box-cars, "piggy backs", locked storage areas and unattached trailers, etc.

2. The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting (UCR) surveys. Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. Number of Offences represents only those offences reported to, or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.

3. The incidence of break and enter crimes is defined as the number of break and enter offences per 1000 population. It is based on the number of break and enter offences occurring within each jurisdiction and on the resident population. Rates per 1000 population are based on a population which excludes tourists, commuters, or "part time" residents such as students or cottage/chalet owners.

4. The Provincial Force Rate Per 1000 Population shown in the above table is generated from the total number of offences and total population for the Provincial Force; it does not represent the average of the rates for each individual jurisdiction.

5. The Provincial Force provides policing services to municipalities under 5,000 population, as well as to the unincorporated areas of the Province. Provincial detachments are usually named after a municipality; however, if the municipalitity is under 5,000 population, the detachment polices not only that municipality but also the unincorporated or rural areas surrounding it. If the municipality is over 5,000 population, the detachment polices only the surrounding unincorporated area.

6. The data contained in this report may vary when compared with previous reports prepared by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES

(1) Polcd 317 Nelson Prov includes Polcd 304 Crescent Valley Prov which was closed in March 1987.
(2) Polcd 329 Elkford Prov was opened in 1981.
(3) Polcd 524 Tumbler Ridge Prov was opened in 1983.
(4) Prior to 1987, Polcd 742 Bowen Island Prov was included in Polcd 721 N. Vancouver District Municipal.
(5) Polcd 914 Powell River Prov includes Polcd 924 Texada Island Prov.
(6) From 1983 onward, population figures for Polcd 712 Maple Ridge Prov are included in Polcd 741 Pitt Meadows Extended Municipal.
(7) Population figures include Indian Reserve and municipal populations.
(8) Polcd 205 Blue River Prov was closed in 1984.
(9) Polcd 609 Ocean Falls Prov was closed in 1982.

DATA QUALIFIERS

1. Population figures are based on the results of the Canada Census which is conducted every five years. Canada Census occurred in 1976, 1981, and 1986. Population figures for intervening years are estimates based on these Census data.

2. Population figures reflect the "resident" or "late night" population of an area, rather than the number of people who spend some part of the day in the area either for business or pleasure purposes. Furthermore, populations do not take into account "resident non-residents", i.e. cottage/chalet owners or students residing at universities or colleges whose permanent residence is in another jurisdiction.

3. The Provincial Force provides policing services to municipalities under 5,000 population, as well as to the incorporated areas of the Province. Provincial detachments are usually named after a municipality; however, if a municipality is under 5,000 population the detachment polices not only the municipality but also the unincorporated or rural area surrounding it. If a municipality is over 5,000 population, the detachment polices only the surrounding unincorporated area.

4. The data contained in this report may vary when compared with previous reports prepared by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES

(1) In 1988 the boundaries of the Greater Vancouver Regional District (GVRD) were expanded to include the City and District of Langley; prior to 1988 these jurisdictions were located within the Central Fraser Valley Regional District. The data and rates from 1988 onward reflect this change. It should be further noted that offence data for the GVRD reflects reporting on the part of Ports Canada Police.

(2) In October 1987 the Fort Nelson-Liard Regional District was created to include the Town of Fort Nelson and the surrounding rural area. Prior to 1988 this jurisdiction was located within the boundaries of the Peace River-Liard Regional District. The data and rates from 1988 onward reflect this change. It should be further noted that since the creation of the Fort Nelson-Liard Regional District, the Peace River-Liard Regional District has been known as the Peace River Regional District.

DATA QUALIFIERS

1. The offence data shown above have been recorded by the police on the Uniform Crime Reporting (UCR) surveys. Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences where a single incident with multiple victims is scored as only one offence, police score one offence for every victim of a "violent" crime, i.e. homicide, attempted murder, sexual and non-sexual assault, and abduction. Number of Offences represents only those Criminal Code offences reported to, or coming to the attention of police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.

DATA QUALIFIERS Cont'd

2. Number of Offences includes Criminal Code - Property, Person, and Other offences. Criminal Code - Property offences include break and enters, motor vehicle thefts, theft over and less than $1000, fraud, and possession of stolen property. Criminal Code - Person offences include "violent" crimes such homicides, attempted murder, sexual and non-sexual assaults, robbery, and abduction. Criminal Code - Other offences include prostitution, gaming and betting, possession of offensive weapons, as well as arson, bail violations, disturb the peace, and mischief and property damage. Criminal Code - Traffic offences are not included in Number of Offences.

3. The Rates Per 1000 Population shown in the above table are based on the "resident" or "late night" population of each regional district, rather than the number of people who spend some part of the day in the area either for business or pleasure purposes, i.e. commuters or tourists. Furthermore, these rates do not take into account people whose permanent residence is in another regional district, i.e. "resident non-residents" such as cottage/chalet owners and students residing at universities or colleges.

4. The rates per 1000 population shown in the above table are generated from regional district totals; they do not represent the average of the rates for each individual policing jurisdiction located within the regional district.

5. The Regional District Total Rate Per 1000 Population shown on the last line of the above table is generated from total UCR data for British Columbia; it does not represent the average of the rates for each individual regional district.

6. The data contained in this report may vary when compared with previous reports prepared by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.

FOOTNOTES

(1) In 1988 the boundaries of the Greater Vancouver Regional District (GVRD) were expanded to include the City and District of Langley; prior to 1988 these jurisdictions were located within the Central Fraser Valley Regional District. Populations from 1988 onward reflect this change.

(2) In October 1987 the Fort Nelson-Liard Regional District was created to include the Town of Fort Nelson and the surrounding rural area. Prior to this date this jurisdiction was located within the boundaries of the Peace River-Liard Regional District. Populations from 1988 onward reflect this change. It should be further noted that since the creation of the Fort Nelson-Liard Regional District, the Peace River-Liard Regional District has been known as the Peace River Regional District.

DATA QUALIFIERS

1. Canada Census occurred in the years 1981 and 1986; population figures for 1981 and 1986 are based on the Census results for that particular year. Population figures for intervening years are estimates based on these Census data.
2. The data contained in this report may vary when compared with previous reports prepared by Police Services. Where variances occur, the report produced at the latest date will reflect the most current data available.
